*A reviewer is presented with a random social media post...*

> my dad said i look like a **china doll** and have the metabolism of a supermodel.... no i just starve like one
>
> *Optional:*
> ○ ○ ○ ○ ○ ○ ○ ○ ○ ○
> 1 2 3 4 5 6 7 8 9 10
>
> ⬅ Previous    ➡ Next

*The original slur used to mine posts is highlighted in red.*

*...reviewer decides for it to be a "true" slur, look like a also needs to be in red (reviewer just clicks those words)*

> my dad said i look like a **china doll** and have the metabolism of a supermodel.... no i just starve like one
>
> *Optional:*
> ○ ○ ○ ○ ○ ○ ○ ◉ ○ ○
> 1 2 3 4 5 6 7 8 9 10
>
> ⬅ Previous    ➡ Next

*If reviewer is inclined, s/he can also mark what they believe is the severity of the slur... then hit next.*

*The next slur is presented. It's important to randomize them so reviewer is not just seeing "china doll"*

> it's a mental virus, only the weak of minds contract the Chink flu. maybe you should stop hitting the gym and go to the library. i am immortal
>
> *Optional:*
> ○ ○ ○ ○ ○ ○ ○ ○ ○ ◉
> 1 2 3 4 5 6 7 8 9 10
>
> ⬅ Previous    ➡ Next

*While chink is enough to generate a slur...*

*... the reviewer decides to click on flu and make "Chink flu" the slur that is recorded.*

> it's a mental virus, only the weak of minds contract the Chink flu. maybe you should stop hitting the gym and go to the library. i am immortal
>
> *Optional:*
> ○ ○ ○ ○ ○ ○ ○ ○ ○ ◉
> 1 2 3 4 5 6 7 8 9 10
>
> ⬅ Previous    ➡ Next

*Again, all the reviewer has to do is click on flu one time and it turns red. Reviewer is alarmed enough to select 10 as severity and then hits next.*

*Reviewer sees death to china in red, but may not feel like this is a slur that needs a response*

> Geraldo, do you really believe the stats? When there is a financial incentive for hospitals to attribute ANY **death to Chinese** virus? Cancer + corona = corona /Heart disease + corona = corona /pneumonia + Corona = corona. If classified as corona — don't hospitals get all $ reimb.
>
> *Optional:*
> ○ ○ ○ ○ ○ ○ ○ ○ ○ ○
> 1 2 3 4 5 6 7 8 9 10
>
> ⬅ Previous    ➡ Next

*They need to click on death to chinese virus and turn it green to show this phrase is not enough of a slur to merit a response*

*Reviewer has to click death once to change it from red to green, but has to click virus twice.*

> Geraldo, do you really believe the stats? When there is a financial incentive for hospitals to attribute ANY **death to Chinese virus**? Cancer + corona = corona /Heart disease + corona = corona /pneumonia + Corona = corona. If classified as corona — don't hospitals get all $ reimb.
>
> *Optional:*
> ○ ○ ○ ○ ○ ○ ○ ○ ○ ○
> 1 2 3 4 5 6 7 8 9 10
>
> ⬅ Previous    ➡ Next

*As the reviewer clicks, there are three color options... red (bad), green (good) and no color (neutral).*

*The reviewer is presented Chinazi as a slur, but is alarmed to see asian hitler*

> chinese communist party is incorporating the xi jinping thought in education, it began the brainwashing based on the cult of personality to the children of china. xi jinping is trying to become the asian hitler definitely. #xijinping #Chinazi #asianhitler
>
> *Optional:*
> ○ ○ ○ ○ ○ ○ ○ ○ ○ ◉
> 1 2 3 4 5 6 7 8 9 10
>
> ⬅ Previous    ➡ Next

*The user would prefer to make asian hitler the slur in this specific social media post*

*Reviewer clicks on Chinazi twice (from red to green to no color at all)*

> chinese communist party is incorporating the xi jinping thought in education, it began the brainwashing based on the cult of personality to the children of china. xi jinping is trying to become the **asian hitler** definitely. #xijinping #Chinazi #asianhitler
>
> *Optional:*
> ○ ○ ○ ○ ○ ○ ○ ○ ○ ◉
> 1 2 3 4 5 6 7 8 9 10
>
> ⬅ Previous    ➡ Next

*Then user clicks on asian once (red) and hitler once (red), marks it as a 10 and hits next.*

*You can decide if you want to allow a reviewer to click non-contiguous words in a single post.*

> chinese communist party is incorporating the xi jinping thought in education, it began the brainwashing based on the cult of personality to the children of china. xi jinping is trying to become the **asian hitler** definitely. #xijinping #Chinazi **#asianhitler**
>
> *Optional:*
> ○ ○ ○ ○ ○ ○ ○ ○ ○ ◉
> 1 2 3 4 5 6 7 8 9 10
>
> ⬅ Previous    ➡ Next

*I do not recommend this be allowed. Reviewer has to choose the "worst" slur and the words must be next to each other.*

*Otherwise, you will have reviewers looking for multiple slurs in a single social media post*

> I don't think so. They will fail eventually but I want less people to die because of China. From the time **China illegally sold** Fentanyl to cause more than 100,000 Americans **death to Chinese** virus Microbe that kills people all over the world, people need to unify to fight against them
>
> *Optional:*
> ○ ○ ○ ○ ○ ○ ○ ○ ○ ○
> 1 2 3 4 5 6 7 8 9 10
>
> ⬅ Previous    ➡ Next

*And even worse, some reviewers may need different parts of the post to actually construct the slur.*

**Process:**
1. Table is pre-loaded with slur, like death to china, china doll, chinazi, etc.
2. Social media is scraped for any posts containing these exact phrases.
3. Posts are presented to reviewers, who must expand, contract or neutralize the slur.
4. Reviewer has three options - red, green and no color - all done by just clicking words.
5. Reviewer can optional add some metadata on the level of the slur (1-10).

6. New slurs are added to that night's scrape of social media posts.
7. Identified slurs (by reviewers) are sent to remediators for action.
8. Remediator reads the slur, clicks through to the post and then sends DM.

9. As reviewers and remediators learn the system, new options can be added or unhidden.

⬅ Previous   ✔ Approve    ✖ Reject   ➡ Next

*This is not a slur... in fact, it's supportive and deserves a compliment comment*

*This is too ambiguous and the reviewer would prefer to just move on to more obvious slurs for review and intervention*
